

Orðakista ASÍ

THE ASÍ ORÐAKISTA - OK

ORÐAKISTA ASÍ / OK

Orðakista ASÍ – OK is a dictionary app intended for labour union representatives and foreign union members. The application provides translations of words related to the Icelandic labour market. It is based on existing collective agreements and other published labour market materials. The aim was to create an app that is quick and simple in use. When the user enters a word, the app displays all forms of that word found in the database, together with a translation and examples of use. The app is available for all smart devices, with both Android and IOS versions available on Google Play Store and Apple's App Store.

AIM

The app was created to assist union representatives in their roles and with communicating with non-Icelandic speaking coworkers. The app can be useful to both Icelandic union representatives as well as all workers who are not native Icelandic speakers. Orðakista app can be used in all sectors where non-Icelandic speaking workers need support understanding specific labour market words.

NEXT STEPS

The first edition includes translations from Icelandic into English. Work on an English to Icelandic version has already started, in addition to translations between Polish and Icelandic. The app is a collaborative project and Rit ehf. oversaw the development and design of the app.
